

PRODUCT INTRODUCTION FOR

GLOBAL DRY ICE FO

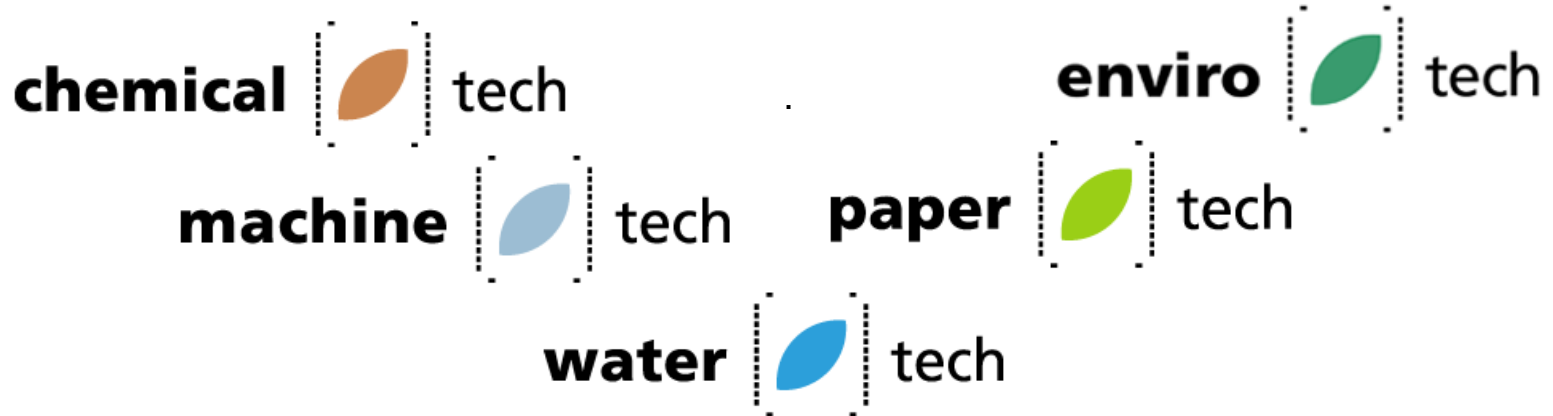

Remarkably effective ... Surprisingly simple

WHO WE ARE?

Applied Chemicals offers a wide and growing range of technologies that can help businesses to become more effective in measuring and controlling their emissions, whilst managing their operations and costs. This includes an atmospheric odor measurement and dispersion modeling system, microbiological products for land remediation or the improvement of the biological treatment of waste water, compost additives, odor neutralization products and airborne emission control equipment.

APPLICATION

INDUSTRIAL

COMMERCIAL

Hygiene For Professionals

THE RITZ-CARLTON
HOTEL COMPANY, L.L.C.

OUR SCIENCE

FRESH WAVE IAQ odor eliminators

Natural, non-toxic and biodegradable active ingredients

Water

Lime

Pine needles

Aniseed

Clove

Cedarwood

GOOD FOR THE EARTH, EVEN BETTER FOR ODORS!

OUR SCIENCE – BACK TO BASIC

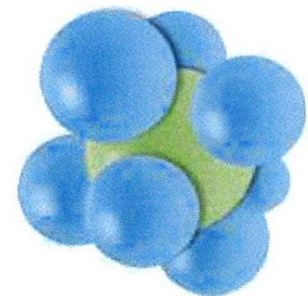

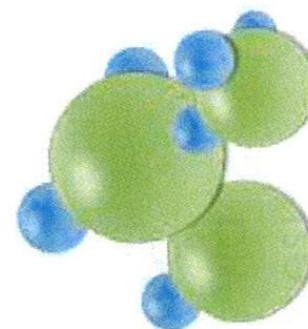

Industrial odor control,
now available for commercial use!

Fresh Wave IAQ (What is it?)

- A proprietary blend of plant oils, food-grade surfactant and water.

Fresh Wave IAQ (Is it safe?)

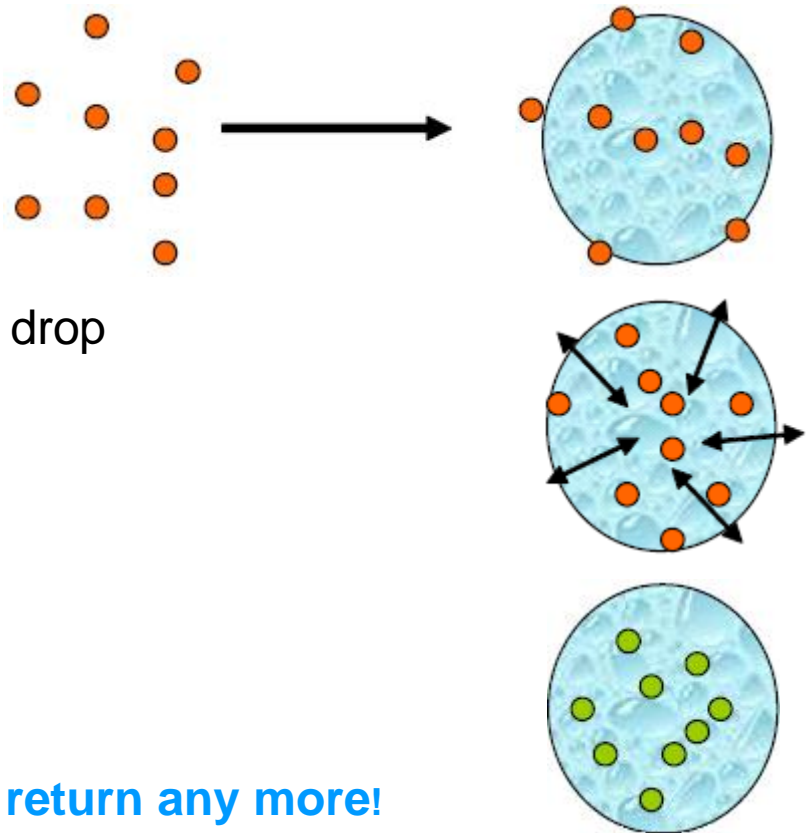

- no alcohol
- no chemicals
- non flammable
- non-toxic
- not dangerous for human/pets/environment
- ecological
- bio-degradable

OUR SCIENCE – BACK TO BASIC

How does Fresh Wave IAQ work?

1. **Adsorption**
▶ weak electric-statical connection at the top of the water drop
2. **Absorption**
▶ gas solution
3. **Reaction**
▶ acid-based reaction

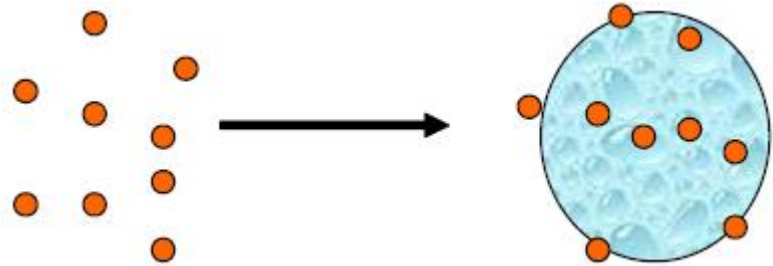

The smell is gone and doesn't return any more!

OUR SCIENCE – BACK TO BASIC

ADSORPTION

- The mix of natural oils covers the water drop. This covering produces a weak electro-static charge, which attracts the bad smelling molecules.

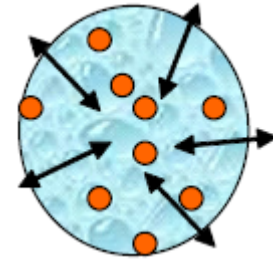

> Bad smelling molecules will be attracted.

OUR SCIENCE – BACK TO BASIC

ABSORPTION

- The ethereal oils in the water drop works as a link and form a connection with the gasses. As soon as the water drop is completly filled, it simply falls on the ground.

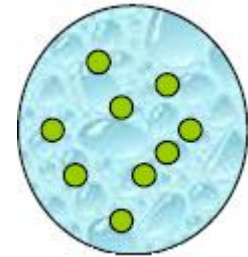

> Bad smelling molecules form a connnection.

OUR SCIENCE – BACK TO BASIC

REACTION

- Fresh Wave AQ is starting now to reverse the polarity of bad smells molecules, those will be transformed permanently to organic salts.

> Bad smelling molecules are neutralised

FRESH WAVE IAQ MARKETS

Fresh Wave IAQ has established opportunities and initiated testing in the channels listed below:

- Fire and water restoration
- Carpet cleaning/Carpet Extraction
- Janitorial Services
- Healthcare
- Hospitality – hotels, resorts, cruise ships
- Schools/Education
